### **DETAILED ACTION**

1. This communication is responsive to preliminary amendments filed 9/17/04 and 11/23/04. Claims 1-26 are currently pending in this application.

#### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

3. Claims 1-6, 8-19 and 23-26 are rejected under 35 U.S.C. 102(a) as being anticipated by Debbins et al. P.N. 6,522,141 (Debbins).

Debbins discloses a MRI system with an interactive MR geometry prescription control. Applicant's attention is directed to Fig. 3 and corresponding description. A planning representation of a "standard" object in the form of a real time image, which substitutes the scout images of the prior art (see col. 1), is displayed in a graphical user interface 105. By interaction with the displayed image with an input device 101, an operator defines spatial positions, prescribing an imaging protocol. Note the use of icons in the interface. Debbins meets all the limitations of the claims at issue.

#### ***Allowable Subject Matter***

4. Claims 7 and 20-22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2859

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

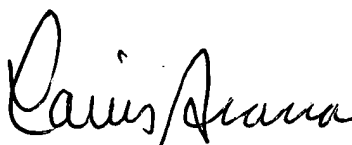

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hardy et al., Balloni et al. and Debbins '035 all disclose devices for scan control in MRI systems. Note the abstract of each disclosure. Hardy '684 discloses a method for generating and displaying atlas images.
